WILD
detroit

Women in Lighting + Design's mission is to provide the lighting community an inclusive and open environment for professional and personal growth by offering networking, mentorship, and knowledge sharing. We are open to all women and their allies, creating a supportive and safe network for all.

Join us at our networking events for animated discussions on women in the workplace and current lighting trends while making new friends and meeting mentors. Learn from our history and discuss how we can strive to push forward as a group and individually.

We are WILD.

CEU

PRESENTATIONS

CEU
3-4pm

Benefits of Installing Warm Street Lights

Attendees will learn the causes & negative impacts of light pollution, learn some approaches to mitigate the source of light pollution, Learn some of the economic benefits for adhering to International Dark Skies Association requirements, and explore the environmental impact of minimizing light pollution within site-specific case studies.

Robert Hahn

Robert Hahn is a partner at Lumecon, who is a go-to product line for high-quality American made fixtures. Bob works to be proficient in effective communication with individuals by speaking common languages, empathizing, and understanding an individual's style and behavior.

Michael Woznicki

Michael Woznicki has been a Project Engineer with Lumecon for thirteen years and performs their photometric analyses, developing lighting plans for outdoor and indoor applications. Michael has been Lighting Certified (LC) through the NCQLP since 2011. Michael is a graduate of the University of Michigan with a Master's degree in Landscape Architecture from the School of Natural Resources & Environment.

BUY TICKETS

CEU
4:30-
5:30pm

The Science of Color Accuracy : TM30

Attendees will receive an overview of TM-30 and Annex E. TM-30 uses state of the art color science and produces more information with higher accuracy about color rendition. TM-30, together with other quality metrics, is used to design optimal products.

Bridget Ford Cross

Bridget Ford Cross works as a Regional Sales Manager for Ecosense Lighting, working closely with the architectural lighting community. She is obsessed with exquisite design and lighting technology. She has worked for small start-up lighting manufacturers as well some of the world's largest lighting companies, giving her the chance to share her passion with others. She is a Toastmaster CTM, IES Chicago section past president, and recently served as Membership chair for WILD International. She has addressed AIA groups, spoken at Light-fair International and has been a guest speaker or instructor for lighting courses throughout the Midwest. She continues to walk through life keeping an eye out for beautiful lighting.

BUY TICKETS

CEU
6-7pm

Specifying Sustainable Luminaires

This presentation provides an overview of the elements of sustainability and how to best specify sustainably designed luminaires. Attendees will be given the tools to recognize the key elements of sustainability & their impacts, distinguish between various materials transparency disclosures, understand luminaire related sustainability requirements and apply the principles discussed to specify the most environmentally responsible lighting equipment for their projects.

Anita Majumdar

Anita Majumdar is the Director, Specification Sales for Acuity Brands, a leader in innovative, commercial, residential, industrial, hospitality and controls solutions. A Sales Leader with over 15 years of lighting industry experience, Ms. Majumdar joined Acuity Brands in December 2015.

Involved within the Central U.S. WILD, IES and various lighting associations as well as active volunteering in the Chicagoland community.

Prior to joining Acuity Brands, Ms. Majumdar was with Juno Lighting Group holding various positions. Anita is located in Des Plaines, IL outside of Chicago.

ABOUT

IES DETROIT

We are the Detroit based section of the Illuminating Engineering Society, a not-for-profit organization dedicated to all aspects of the ART and SCIENCE of ILLUMINATION.

The IES is the recognized technical authority on illumination. For over a century its objective has been to communicate information on all aspects of good lighting practice to its members, to the lighting community, and to consumers through a variety of programs, publications and services. The strength of the IES is its diversified membership consisting of: engineers, architects, designers, educators, students, contractors, distributors, utility personnel, manufacturers, and scientists, all contributing to the mission of the society: to advance knowledge and disseminate information of the improvement of the lighted environment to the benefit of society.

The IES is a forum for the exchange of ideas and information and a vehicle for its members professional development and recognition. Through its committees, with hundreds of qualified members from the lighting and user communities, the IES correlates research, investigations, and discussions to guide lighting experts and laypersons via consensus-based lighting recommendations.

SIMPLY BRILLIANT

Touché Lighting Control develops innovative technologies that focus on simplicity. We build lighting controls that have enhanced features that allow users to intuitively install and manage their environment through a mobile app running on a smartphone or tablet device. We understand that a lighting control solution should just work — a system that is efficiently designed, easily installed, and simply operated.

Architectural Lighting Works (ALW) is an innovative, award-winning architectural lighting manufacturer based in Northern California, with a mission to **Illuminate the Soul®** via a portfolio of over 100 linear, cylinder, ring, and decorative luminaires

ALW has been creating inspiration and illumination since 2005 for clients such as the NFL, Microsoft, Starbucks, Google, Gensler, Perkins + Will, and Tesla.

Our vision is to **Illuminate the Soul®** with our innovative and highly configurable designs, translating your raw vision to dazzling reality while providing you with a world-class customer experience.

Our mission is to create lighting that inspires, delivering the highest quality visual experience for virtually any space. Our state-of-the-art manufacturing facility empowers you with the tools and flexibility to use our lighting solutions as a way to transform your spaces into something unique and dynamic.

Call **510.489.2530**
Email **TalkToUs@alwusa.com**
Web **www.alwusa.com**

ALW USA HQ and Experience Center:
1035 22nd Avenue, Unit 1, Oakland CA 94606

ALW

Founded in 2005, ALW manufactures thoughtfully designed architectural lighting solutions with a client-centric approach. We bring designers' visions to light with a diverse portfolio of linear, cylinder, ring, and decorative lighting products designed with beauty and purpose. Our products are a versatile combination of configurable and pre-designed shapes, with unparalleled performance, tailored to fit your space.

Our mission is to create lighting that inspires by delivering the highest quality visual experience for virtually any space. Our state-of-the-art manufacturing facility empowers designers with the tools and flexibility to use our lighting

solutions to transform their spaces into unique and dynamic environments.

We manufactured the lighting installed in the Distillery of Modern Art (DoMA), specifically the Crescent MoonRing (illuminated arcs above the bar area) and the Five Bow (geometric linear shapes in the hallway and event space area).

The DoMA installation exemplifies the innovative product design and versatile manufacturing ability we take great pride in at ALW. We are proud to be chosen as the primary lighting manufacturer for this unique project, helping bring the Vickers Design team's vision to light.

DoMA is an incredibly dynamic space that requires intentional lighting. This project features our Crescent

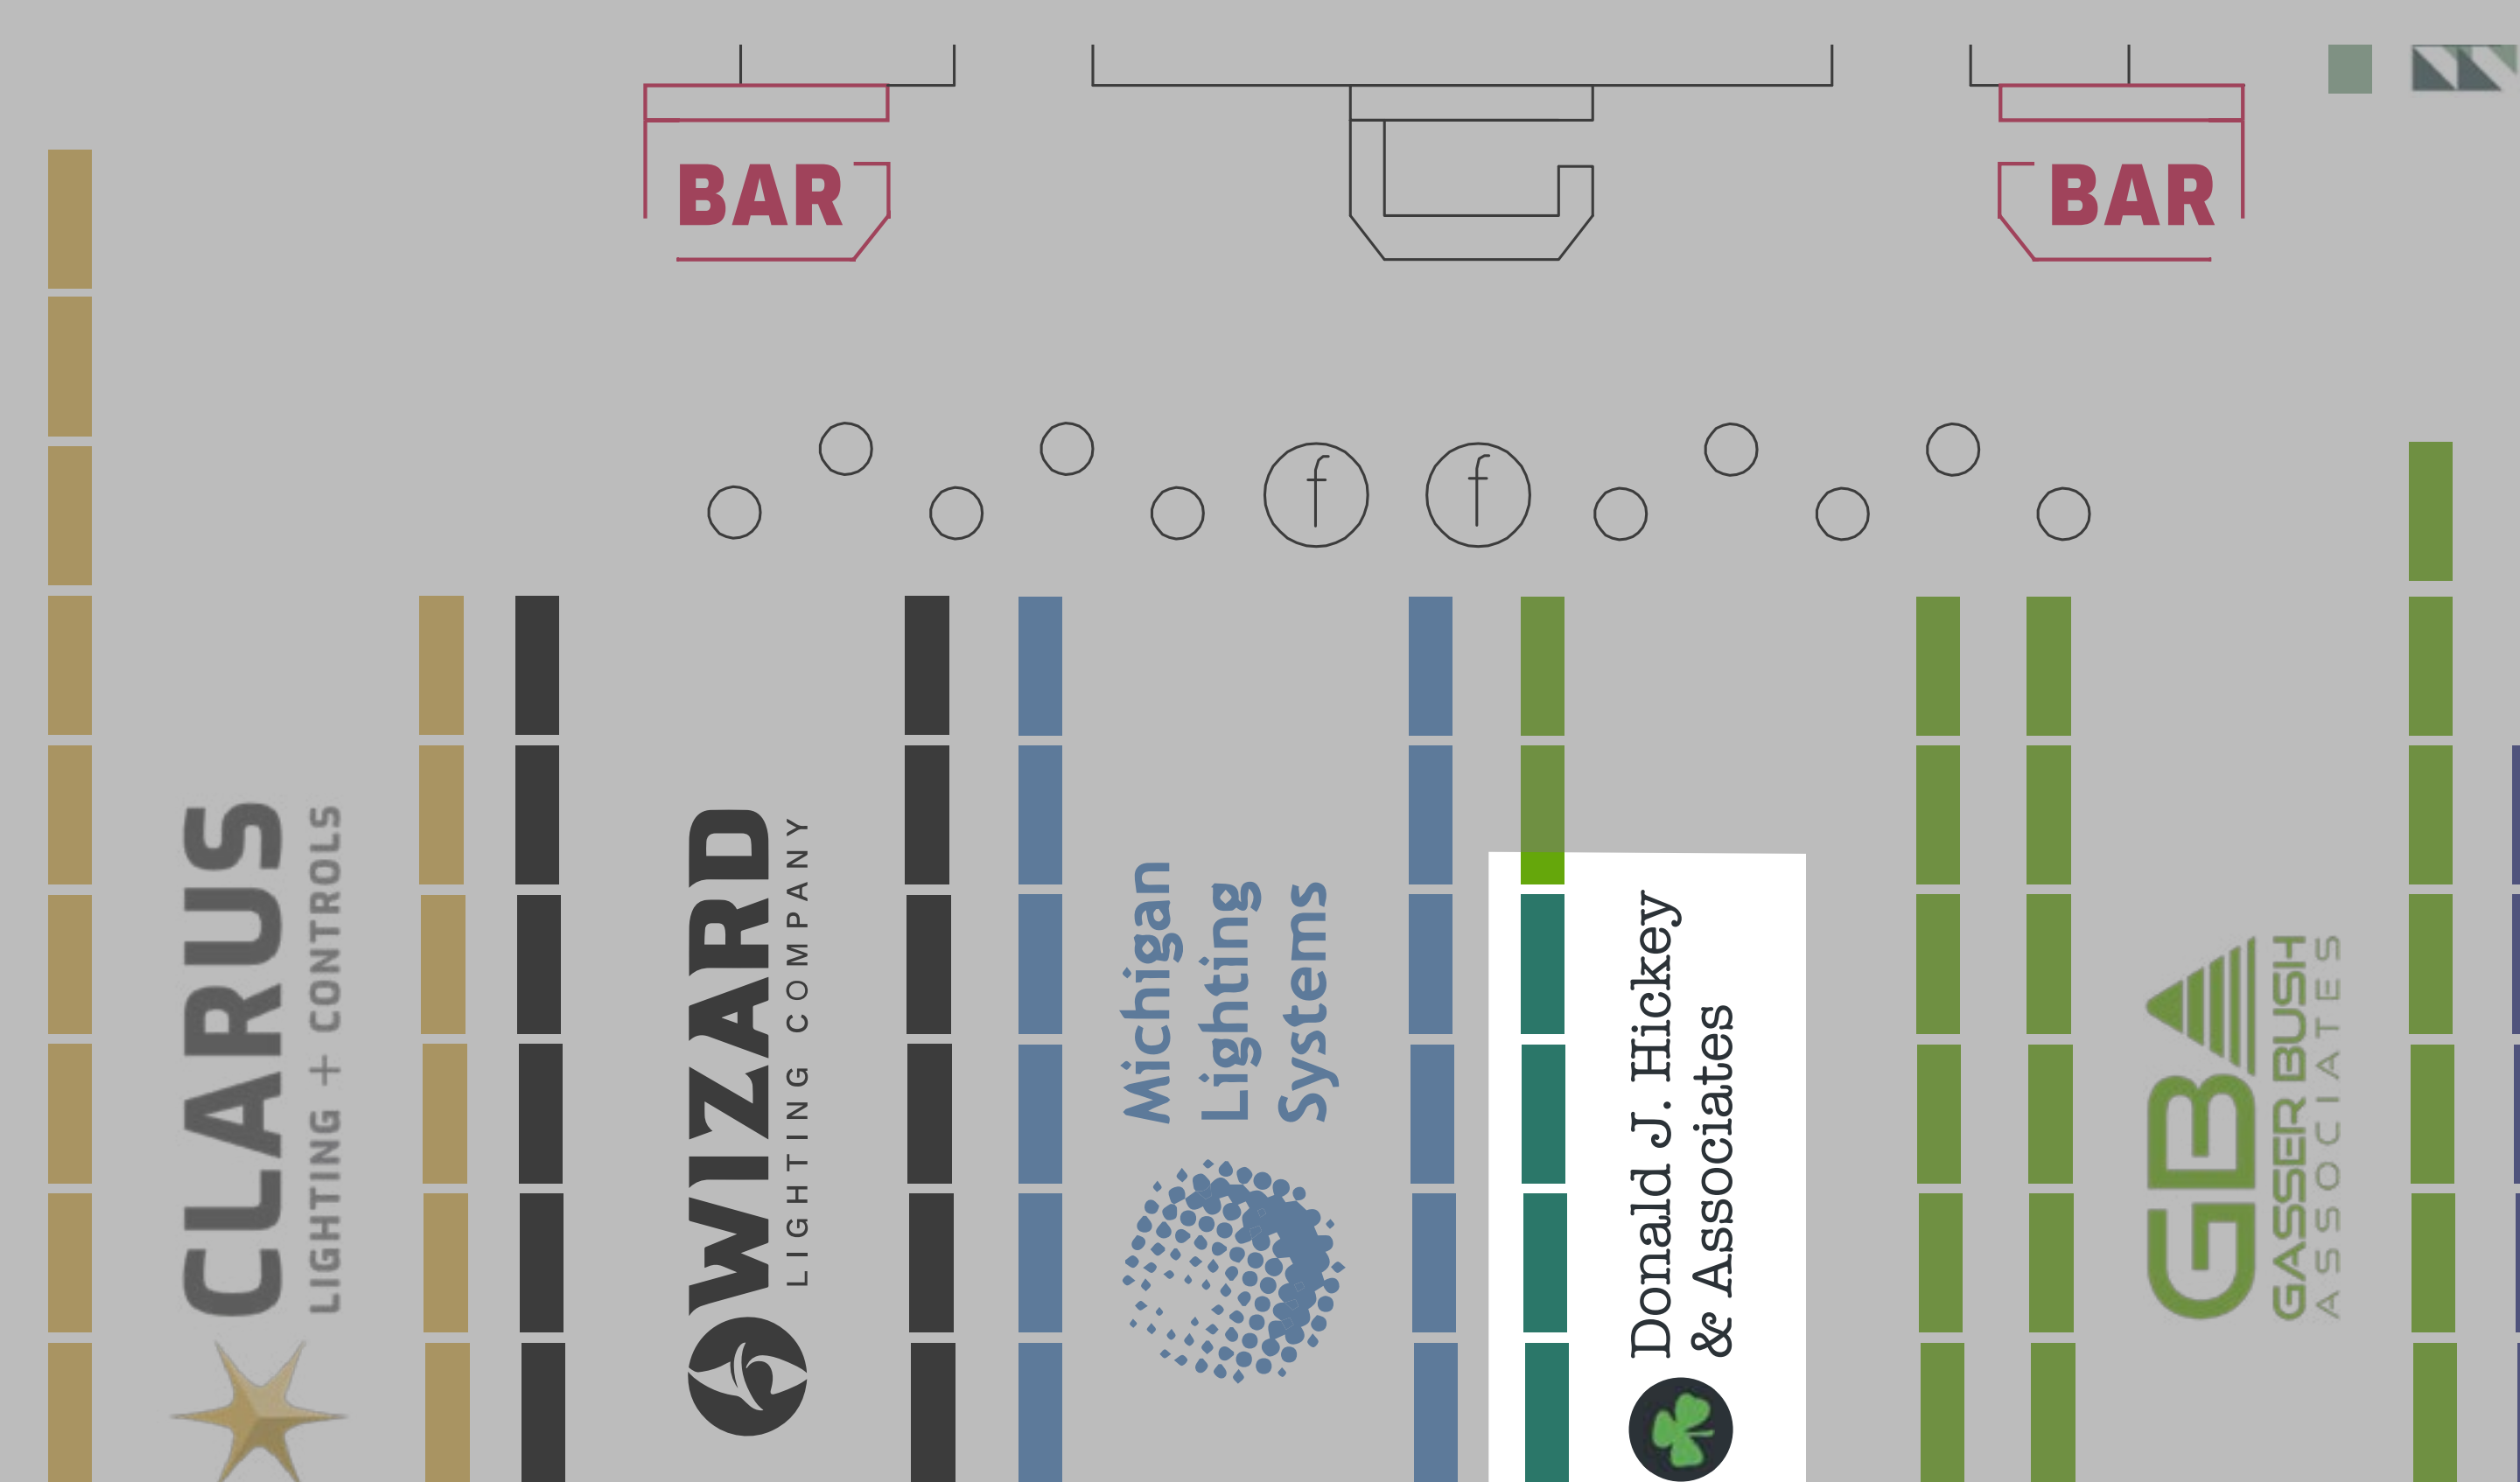

MoonRing pendants which effortlessly complement the architecture and reflect the modernist abstract art motif while providing functional, performance illumination. Our geometrically configured Five Bow pendants provide a subtle wayfinding element and a pop of copper colour, creating a bold and artistic statement in both the hallway and the open event space. We applaud the design team at Vickers Design Group for their innovative design, especially their use of lighting as a luminous art installation within each room of this distinctive art gallery/distillery. ■

SABER & SABER MINI By PureEdge Lighting *Create Suspended Dimensional Illumination*

Saber and Saber Mini, our patent-pending suspended lighting systems, take outdoor architectural lighting to the next level by creating one-of-a-kind, dimensional, 'laser beam' illumination. LED rounded strips of light create soft, glare-free ambient illumination with no visible pixelation. Saber features a profile of 0.8" while Saber Mini features a smaller profile of 0.6" and bends up and down giving it the unique ability to traverse open spaces wall to wall, wall to ceiling, or floor to ceiling. Available in RGB and RGBW, Warm Dim, and Tunable White (2000K – 6500K) for design flexibility.

| Lightcloud Blue

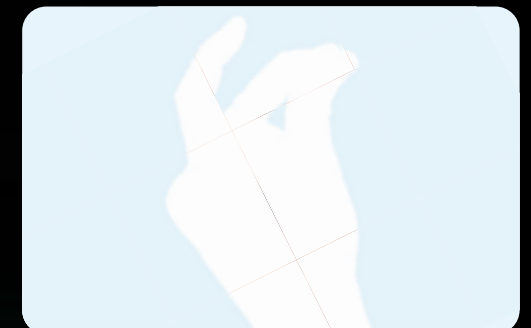

Lighting Control Made Easy.

Lightcloud Blue is a powerful, flexible, simple lighting control system designed to manage lighting wirelessly, without the need of a Gateway or Hub. It's as easy as downloading the Lightcloud Blue app, connecting your enabled products, and quickly configuring them.

Rapid Provisioning

Patent-pending technology that allows users to easily commission devices in large groups, so you can get hundreds of devices connected in minutes instead of hours!

Scalable and Flexible

Lightcloud Blue makes it simple to start small and scale up. Because it's so easy to grow, the system is equally capable of managing residential, commercial, or industrial applications.

Bluetooth® Mesh Connectivity

Lightcloud Blue devices are controlled via an independent, self-automated Bluetooth mesh system. Each device in that system can communicate directly with any other device in it.

RAB Lighting is committed to creating high-quality, affordable, well-designed and energy-efficient LED lighting and controls that make it easy for distributors to sell, electricians to install and end users to save energy.

Founded in 1946, RAB has a vibrantly growing infrastructure of manufacturing facilities, and engineering capabilities that ensure great product design and quality.
